## *Cocktail Guide*

The word cocktail gets thrown around and its origins just as much. There's print from 1798 of British punches being made from fruit and spices. And in 1803 the word "cocktail" was finally printed in "The Farmers Cabinet" Amherst New Hampshire. Then 3 years later in 1806 a New York paper pinned the definition down to what we know it as today: "A stimulating concoction composed of any kind of sugar, water, spirit and bitters". What we are calling an "Old fashioned" these days in the industry is exactly that.

Over the past 2 centuries cocktails have seen all sorts of styles, from perfectly stirred masterpieces to florescent coloured overly sugary abominations. A barkeep was considered quite a noble profession for a solid century, including throughout America's prohibition where the next wave of cocktails was inspired. They all relate back to the godfather, Jerry Thomas, who's pioneering work popularized cocktails throughout the mid 1800's.

Nowadays we are twisting and adding all kinds of new gastronomic techniques to achieve amazing new libations based on what Jerry Thomas wrote as our guide. In this menu there will be some classics, some twisted classics, modern classics and some OG blends of cocktail amalgamation. There will be 2 drinks in here everyone in the world will love, and 2 drinks in here that everyone will hate. Use the flavour chart to narrow down what you are in the mood for, as we think they are all great in their own way.

We hope you enjoy!

## Dorothy Mantooth Punch

*Non alc 13.5*

*With Rum or Gin 18.5*

*Guava, mango, ginger, citrus,  
spiced punch.*

## Sex Panther
